Search for IS01 in the search box.

Ref:
IS-01

Kit Contains:

- 1x Lampholder
- 1x Cable Cord Set
- 1x Backplate & Cover
- 5x Wood Screws
- 1x Cord Grip

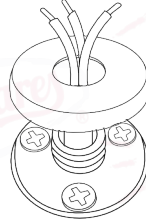

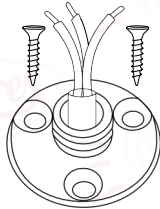

Before you start please ensure you are competent to carry out electrical works and ensure the electricity is turned off.

If in any doubt stop what you're doing and seek professional advice.

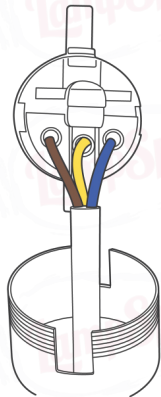

Step 1: Install the cable cord set ensuring not to damage it as you push/pull it through your light fitting.

Ensure to leave this loose so you can adjust the length when on step 5.

Step 2: Fit the backplate over the cable and fix it down onto your wooden lamp using the supplied screws, then place the cover over the top.

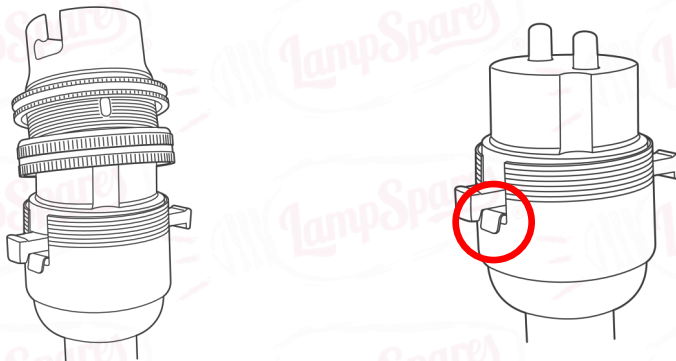

Step 3: Take the bottom part of the lampholder and slide it over the cable then screw it onto the backplate thread.

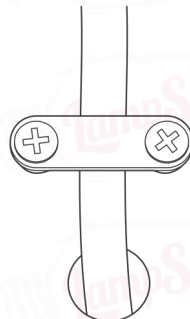

Step 4: Wire the cable into the connection unit of the lampholder, ensuring the Earth (Green/Yellow) is in the middle connection. It does not matter which way around the Live (Brown) and Neutral (Blue) go.

Step 5: Carefully push the connection unit into the base of the lampholder and screw the top section onto the lampholder.

Please Note: The copper tag is to sit over the indent on the lampholder so it is slightly visible.

Step 6: Ensure you use the cord grip on the bottom of the light fitting by putting it across the cable and using the screws supplied to fix it into position, this will ensure the cable cannot be pulled out by accident.

If you have any concerns or difficulties in connecting this product please contact us, details at the bottom of this guide.

All electrical parts confirm to BS standards and have full CE approval, please email for copies.
